EDUCATION

2022 - 2026

Del Institute of Technology

- Bachelor of Information Systems

SKILLS

- Analytical & Critical Thinking
- Problem Solving
- Communication
- Teamwork & Collaboration
- Adaptability
- Time Management
- Attention to Detail
- User-Centered Thinking (UI/UX)
- Data-Driven Thinking
- Fast Learner

LANGUAGES

- Indonesia (Fluent)
- English (Intermediate)

PROFILE

Information Systems student with interdisciplinary expertise in UI/UX design and data analysis, focused on creating user-centered and data-driven digital solutions. Experienced in designing intuitive interfaces, conducting system analysis, and extracting insights using Python and SQL. Completed an internship at PT Dayamitra Telekomunikasi, contributing to the development and enhancement of internal applications within the Project Management Office (PMO) unit. Strong analytical and problem-solving skills, with a growing portfolio of UI/UX and data projects demonstrating the integration of design and technology.

WORK EXPERIENCE

Application Development Intern - PT Dayamitra Telekomunikasi (Mitratel) Jun - August 2025

- Contribute to the development and improvement of internal applications used by the PMO (Myclopedia) unit.
- Support the design and improvement of application interfaces to improve usability and efficiency.
- Collaborate with team members to align application functionality with project management workflows.
- Assist in verifying application usability.

Del Corner Cafe - Digital Cafe Management System Jan - May 2025

Information Systems Project (PSI)

- Designed and developed a digital cafe management system to streamline ordering, menu management, and transaction tracking.
- Analyzed system requirements and user needs for customers and staff.
- Implemented system features using HTML and Python.
- Improved operational efficiency through digitalization of ordering and transaction processes.

Data Visualization Dashboard - Tableau Jan-May 2025

Data warehouse bisnis intelligence

- Developed interactive data visualization dashboards using Tableau to present insights from datasets.
- Performed data cleaning and transformation before visualization.
- Analyzed trends and patterns to support analytical interpretation and reporting.
- Designed user-friendly dashboard layouts to improve data readability and usability.

AI Chatbot for Church Community Engagement Oct - Dec 2023

Database Project

- Analyzed business processes of an e-commerce system.
- Designed database structures and entity relationships to support system functionality.
- Modeled system workflows and data flow for online transaction processes.
- Applied database concepts to support efficient and scalable system design.
