Data-driven Information Systems student with hands-on experience in end-to-end data analytics, advanced statistical modeling, and business intelligence. Proven track record during a PMO internship at Mitratel, optimizing data quality and corporate reporting reliability. Proficient in leveraging SQL, Python, Tableau, and Pentaho to manage ETL pipelines and build interactive dashboards. Skilled in conducting rigorous statistical research using G*Power and SmartPLS to extract actionable business insights.

Work Experiences

PMO Intern (Data Analysis & Application Support) - PT Dayamitra Telekomunikasi Tbk (Mitratel) Jun 2025 – August 2025

- Performed end-to-end data validation and data quality assurance activities on thousands of operational records utilized across internal corporate applications.
- Executed systematic data cleansing using advanced Microsoft Excel techniques to identify, flag, and resolve missing, duplicate, and inconsistent records, significantly increasing reporting reliability.
- Collaborated closely with cross-functional stakeholders and the Project Management Office (PMO) team to verify data integrity and accelerate issue resolution related to application datasets.
- Contributed to optimizing corporate decision-making processes by ensuring that daily operational reports and system records were complete, accurate, and aligned with business requirements.
- Gained practical expertise in corporate data governance, structured analysis, and operational reporting within a fast-paced telecommunications environment.

UNDERGRADUATE THESIS RESEARCH - Del Institute of Technology Juli 2025 – Juli 2026

- Thesis Title: *Analyzing the Role of Generative Artificial Intelligence (GenAI) in Supporting Customer Discovery Activities in Software Startups*
- Conducted quantitative and qualitative analysis on Generative AI adoption within early-stage software startups using a systematic research methodology.
- Utilized G*Power to calculate the statistical power and determine the minimum required sample size, validating the survey design scientifically.
- Distributed research instruments via LinkedIn outreach to a target pool of over 700 practitioners, securing and validating 142+ clean respondent entries.
- Analyzed complex structural relationships and path coefficients using SmartPLS (SEM-PLS) to evaluate the outer and inner structural models.
- Engineered data preprocessing and cleaning pipelines to filter demographic variables (company size, business models, and operational roles) prior to structural modeling.
- Conducted qualitative data synthesis and evidence mapping from startup practitioner interviews to uncover key adoption factors.

Data Warehouse & Business Intelligence - Del Institute of Technology Januari 2025 - Mei 2025

- Designed comprehensive dimensional models (fact and dimension tables) to consolidate historical student admission datasets of 2,467 applicants.
- Built and implemented automated ETL pipelines using Pentaho Data Integration to clean, extract, transform, and load data from multiple selection tracks (PMDK, USM, UTBK).
- Developed interactive Tableau Public dashboards utilizing Venn diagrams, Tree Maps, and Bar Charts to visualize student distribution metrics and support data-driven enrollment planning.

Global Healthcare ROI Data Storytelling - Del Institute of Technology Januari 2026 – Mei 2026

- Analyzed global healthcare expenditure and life expectancy datasets through statistical exploration to evaluate international investment efficiency.
- Revealed spending inefficiencies and the economic concept of diminishing returns across countries by constructing comparative dashboards in Tableau.
- Transformed complex statistical data into an impactful visual narrative to help stakeholders identify top-performing health infrastructure models

Education

Del Institute of Technology - Laguboti, North Sumatra, Indonesia. Aug 2022 - Sep 2026 (Expected)

Bachelor of Science in Information Systems (S.Kom)

- **Status:** Final-year undergraduate student specializing in Data Analytics and Systems Analysis.

- **Expected Graduation:** September 2026.
- **Relevant Coursework:** Data Visualization, Business Intelligence & Data Warehouse, Database & System Modeling, Systems Analysis, Requirements Engineering.
- **Academic Focus:** Highly experienced in academic projects involving data cleaning, exploratory data analysis (EDA), ETL pipelines, and structural equation modeling (SEM).

Certifications

Associate Data Scientist (Ilmuwan Data Muda) – Sertifikasi Kompetensi BNSP

- *Issued: December 2025 | Valid Until: December 2028.*
- *Data Lifecycle Management: Data Collection, Data Examination, and Data Validation.*
- *Data Engineering & Preprocessing: Defining Data Objects, Advanced Data Cleaning, and Constructing Datasets.*
- *Statistical Modeling: Determining Data Labels, Building Analytical Models, and Evaluating Modeling Results.*

Data Science Introduction - Myskill

- *Understand the basic concepts of data science in an easy-to-grasp manner.*

Statistic - Myskill

- *Apply statistical techniques to analyze data using Excel and Python in case studies.*

Data Analyst Fundamental - Myskill

- *Understand the use of tools for data analysis, such as Microsoft Excel, SQL, and Python.*

Statistic - Myskill

- *Understanding the concepts of Python programming and being able to solve problems based on questions.*

Organisational Experience

Games Person-in-Charge (PIC Games) – Welcoming Party Committee

April 2024 – April 2024

Information Systems Student Association

- Appointed as the Games Person-in-Charge (PIC Games) to design, structure, and manage interactive activities for the annual computer science student integration event.
- Led group ice-breaking sessions and team-building simulations aimed at fostering engagement.

Member of the Spiritual Division of the Information Systems Association

Sept 2024 - Oct 2025

Del Institute of Technology

- Collaborated within a core organizational team (BPH) to plan, structure, and execute spiritual development and character-building programs for 100+ Information Systems students.
- Demonstrated strong teamwork, interpersonal communication, and organizational time management while balancing rigorous academic milestones with student association responsibilities.

Escort Officer (Protocol & Security Division)

Sept 2023 – Sept 2023

Del Institute of Technology

- Collaborated in a team to plan, structure, and execute the annual welcoming and networking event for incoming Information Systems undergraduate students.
- Managed event program flows, coordinated interactive ice-breaking activities, and aligned scheduling to ensure high engagement and smooth communication among participants.
- Assisted in division-level resource allocation and logistical planning to deliver a collaborative environment that promotes a tech-driven student community

Skills

- **Hard Skills**
Python (Pandas, NumPy, Seaborn), SQL (MySQL), Tableau, Pentaho Data Integration (ETL), SmartPLS (SEM-PLS), G*Power, Microsoft Excel (Advanced).
- **Soft Skills**
Analytical Thinking, Problem Solving, Critical Thinking, Attention to Detail, Adaptability, Teamwork, Communication, Fast Learner..
- **Languages**
Bahasa Indonesia (fluent); English (Professional Working Proficiency – TOEFL ITP: **520**).
